Dr. Marshall Nirenberg,
Chief Lab. Biochemical Genetics
NIH, Bethesda, Md. 20014,
U.S.A.

Dear Marshall,

I wrote to you 2 letters but I have not received any reply. Hope you do not mind my writing to you again about the papers. You can understand that after getting addicted, withdrawal is becoming very difficult. I heard about the addiction paper from Werner that you may send it soon. I am sorry I left the acetylcholine paper in the middle, but if you think data is not publishable please let me know. In any case, if you decide to send the papers, I hope you will send me the first draft before it is sent to the Journal. I had also written to you in my earlier letter that I will be happy to come for 3 months in summer if I can do some more work on regulation of adenylate cyclase activity, and its correlation with morphological parameters. I have not done any experiments yet. Most of my time goes in ordering chemicals and instruments.

With best wishes and regards,

Yours sincerely,

Shail K. Sharma
